### Sensing and Control

Honeywell Inc.

11 West Spring Street

Freeport, IL 61032

# Manual Switches

## Sealed Pushbutton Switches

### FEATURES

- High-intensity LEDs indicate status changes – brilliant color display can be distinguished even under high ambient lighting conditions
- Soft-glow LED backlighted legends for low ambient viewing
- Rugged sealed construction withstands effects of shock and vibration – provides dependable switching/lighted display in severe environment applications
- Designed to comply with MIL-S-22885
- Suitable for use in NEMA 4 and 13 enclosures
- Low travel (.030 in. max.), with tactile feedback for definite feel of switching action
- Front-of-panel, hard mounting
- Compact size
- Field-replaceable legends
- UL recognized, CSA certified, and MIL-S-8805 qualified basic switches
- EPM22 electronic control and EPM32 power duty switching for electrical flexibility
- Matching EPM41 indicators for uniform panel appearance
- Choice of two housing styles:
  - Type C: Standard sealed EPM housings
  - Type B: Enhanced sealed EPM housings with IR filters for vehicle lighting security, designed to MIL-STD-461 (EMI shielding), NBC compliance per AR70-71

EPM Series Sealed Pushbutton Switches meet high-performance needs for rugged, compact size sealed switches that are exposed to water, oil, cleaning solvents, and many industrial chemicals. They provide long, reliable operating life under conditions of high shock and vibration in severe environment applications.

In addition to being built to stand up to demanding environments, EPM switches adhere to good human factors principles. The design combines low travel with high tactile feedback and meets arctic glove requirements. Raised barriers on the bezel enhance finger positioning and help prevent inadvertent operation of two abutting units at one push. Lighted display options provide further application versatility.

### LED ILLUMINATION

Long-life LEDs enable reliable illumination. They resist effects of shock and vibration, reducing service and maintenance requirements. (Unlighted versions are also available.)

The following lighting functions can be furnished: High-intensity display using two LEDs to create a brilliant light signal that can be distinguished under high ambient conditions, and/or a pair of LEDs which softly backlight the legend for viewing under low ambient conditions.

There is a choice of red, green or yellow LEDs. Matching indicators, which provide lighted display only, complement the switches to help present a uniform panel design.

### ELECTRICAL FLEXIBILITY

EPM switches can be furnished with one or two SPDT basics. EPM22 electronic control switches handle up to 1 amp, EPM32 power duty switches up to 7 amps.

### EASY TO INSTALL

Front panel hard-mounting is quick and easy. Only a screwdriver is needed to tighten the swing-out mounting lugs, which securely lock and seal the unit in the panel. Though the cover/bracket simply snaps onto the housing, it has inherent tamper resistance. The cover can be removed intentionally with a small screwdriver (or other tool) to add or change legends.

EPM's 3/4-inch square panel cutout on 1-inch centers is suited to row, column, or matrix arrays.

### CONSTRUCTION

Insert can be furnished with or without legends. If legends are to be backlighted, darker colors are recommended for the insert. Black provides maximum contrast in lighted legend displays.

Diffuser plates specified for lighted legend devices are coated on the underside for even illumination. When unlighted legends are specified, diffuser plates are molded from opaque plastic and are not interchangeable with those used for lighted legends.

EPM Series

### SPECIFICATIONS

<b>Environmental</b>	Operating Temperature	-40 to 85°C (-40 to 185°F)
	Storage Temperature	-54 to 85°C (-65 to 185°C)
	Seals	Viton bezel-to-panel gasket seal and neoprene cover seal
	Protection	NEMA 4 and 13
<b>Mechanical</b>	Total Travel	.030 in. (0,76 mm) max.
	Operating Force	20 to 60 oz. (5,56 to 16,7 N) typical
<b>Electrical</b>	Contact arrangement	1 or 2 SPDT
	Electrical rating	EPM22/24 switches – 28 VDC: .5 amp ind., 1 amp res. (sea level or 50,000 ft.), 2 amps max. inrush. 1 amp, 125 VAC (UL code L22). EPM32/34 switches – 28 VDC: 4 amps ind., 7 amps res. (sea level), 2.5 amps ind., 4 amps res. (50,000 ft.). 115 VAC, 60 Hz: 7 amps res. or ind. (sea level).

## EPM Series – Legend Order Sheet

MICRO SWITCH

### Instructions:

1. Enter complete **catalog listing** at right. (Only one catalog listing per legend order sheet).
2. Enter **quantity** for this order and indicate est. annual use.
3. Enter **style**. (Be consistent with catalog listing in regard to lighted and non-lighted legends and high intensity LED).
4. and 5. Enter **area(s)** and print **legend(s)** corresponding to proper area(s). (Do not exceed the maximum number of characters per area).
6. Designate **legend color** for each legend. (If legends are to be lighted, color must be translucent. If legends are not to be lighted, indicate either black or white).
7. Designate **character size** for each area. (Be consistent with available sizes for style entered. If a special legend is desired, contact MICRO SWITCH for assistance).
8. Enter **background color** (letter) using chart below:

(1,6 to 4,8 mm)

Center-to-center: 1 in. (25,4 mm)  
rows or columns

### Circuit Diagram

Switch Circuitry      LED Circuitry

### LED Application Data

External resistors should be added to maintain the LED current at 30 mA max., 20 mA typical. A minimum of 10 VDC open circuit voltage with an appropriate series resistance be used to drive the LEDs. This minimized the effect of temperature (current variation) on forward voltage of the LEDs. The example below illustrates a simple DC circuit and the equation used to determine the value of the series resistance.

$$R_s = \frac{E - V_f}{I_f}$$

Where:  $R_s$  = Series Resistance  
 $E$  = Supply  
 $V_f$  = Forward Voltage of LED  
 $I_f$  = Circuit Current

Example:  $R_s = \frac{10 - 4.4}{.020} = 280 \text{ ohms}$

For:  $E = 10 \text{ volts}$   
 $V_f = 4.4 \text{ volts}$   
 $I_f = .020 \text{ amp}$

Characteristics: LED forward voltage @ .020 mA,  $V_f$ : Red, 4.4; yellow, 4.4; green, 4.6.

### Terminal Detail

### Notes:

1. LED terminals are Type 2 – PC only.
2. Mounting torque: 2 to 2½ in.-lbs.
